CATALYTIC ACTIVITY: L-phenylalanine - trans-cinnamate + NH(3).

PATHWAY: Phenylpropanoid biosynthesis; first step.

SUHCELLHIAR LOCATION: Cytoplasmic (Probable).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        SIMILARITY: BELONGS TO THE PAL / HISTIDASE FAMILY.
